

A close-up photograph of a person's hands holding a small, vibrant green sapling with dark, rich soil. The background is blurred, showing a person in a green and white striped shirt. The overall tone is positive and environmental.

**OUR ENVIRONMENTAL WORK**

# Konftel & the environment

Konftel has a mission to develop and sell products that contribute to a better environment and is dedicated to improving the environment by making active choices.

Konftel has long regarded its environmental activities as a vital part of its operations. In 1998, Konftel participated in the Eco Design project initiated by the Foundation for Swedish Industrial Design. During the project, we analysed the life cycle of the product, from raw material to final disposal. This meant that we were aware early on of the importance of considering the environmental aspects in our product-related decisions.

Our environmental assessment helped us to identify the areas in our operations that we believe it is important to focus on to improve our environmental performance. We have established environmental objectives with procedures, specified a division of responsibilities and drawn up an environmental policy for the identified areas.

The environmental policy serves to reinforce our priority commitment to environmental action within Konftel and our determination to work towards a better environment by making active choices.

# ENVIRONMENTAL POLICY for Konftel AB

Konftel is dedicated to making constant improvements and achieving more sustainable progress.

We will therefore:

- conduct a life cycle assessment for each product,
- comply with legislation and recommendations, be responsive to the requirements placed upon us by our partners and implement preventive efforts to contribute to a better environment,
- focus on effective management of raw materials and energy by following the principle of caution,
- ensure that Konftel's employees and partners are informed of our environmental practices,
- coordinate Konftel's environmental and quality procedures to achieve our environmental and quality objectives,
- minimise the impact on the environment within our company as far as is technologically possible and economically feasible,
- introduce new technology to be more efficient in our utilisation of resources and reduce the volume of waste we produce.

---

On 24th October 2008, Konftel AB decided that the above environmental policy will be used to clearly define our environmental activities within our organisation and externally to our partners.

Peter Renkel  
CEO
